INTRODUCTION

Modern Silver Coinage 1979 is the eighth volume of this publication to be issued by The Silver Institute. The first volume covered each of the four years, 1969 through 1972; succeeding volumes reported data for 1973, 1974, 1975, 1976, 1977, and 1978, respectively. As in previous volumes, Modern Silver Coinage 1979 provides complete information on all silver coins issued in that calendar year. Included are those numismatic coins which are legal tender, coin of the realm, in the country of issue.

The statistics have been verified by the monetary authorities of the issuing countries and are the result of extensive contacts and consultations with ministries of finance, central banks, government and private mints, and numismatic experts in more than 100 countries. Modern Silver Coinage 1979 may contain disparities with other reference works and these may be attributed to one or more of the following reasons:

We report coins issued during the calendar year; other sources may report by the fiscal year, by the year of legislative authorization, by the date on the coinage, by the date of minting, by the total size of the mintage regardless of year, or according to the date the issue was first published.

In statistics, we carry calculations to the fourth decimal rather than rounding statistics to the nearest unit.

We cite the size of the issue rather than the size of the minting unless an exception is noted. The coinage minted in a calendar year is not always issued in its entirety in that year.

We include numismatic coins that are legal tender; some reference works do not.

Physical characteristics of coins are given in millimeters, grams and troy ounces for which the equivalents are shown below.

1 millimeter = 0.03937 inch	1 troy ounce = 1.097 avoirdupois ounces
1 gram = 0.03215 troy ounce	1 troy ounce = 31.1 grams
1 troy ounce = 480 grains	1 million troy ounces = 31.1 metric tonnes

The first pages of this report provide a Summary showing the number of issues and the face value of silver coinage issued by each country, and the consumption of pure silver for coinage by each country and for the world. Pages following the Summary are alphabetically arranged by country. These pages describe in detail every silver issue by each country in 1979.

DEFINITIONS

The captions and headings used in the following pages are defined thus:

The Silver Coinages described in this book are designated by the issuing governments as legal tender money. They are all denominated in currencies except for the Mexico Onza, which that government denominates as money having the value of one troy ounce of pure silver.

Silver Medals, carrying no government designated face value, are not included in this compendium.

Total Issue in Local Currency comprises the total face value of all silver money issued in the calendar year.

Amount of Silver Used refers to the amount of pure silver (not alloy) in the 1979 issues.

****

At the back of this volume is a page giving the details of additional silver coins issued in 1978 but reported to us after publication of our volume of 1978 issues.

The preparation of this study has been made possible only by the generous cooperation of mint directors around the world, the governors of central banks, ministers of finance, economists and numismatic experts who have contributed liberally of their time and energy for the realization of Modern Silver Coinage 1979. We gratefully acknowledge their invaluable aid.
